

THE MUELLER GROUP ROHS & WEEE COMPLIANCE

The Mueller Group, Inc. is committed and concerned with the demand to be compliant with the restrictions on the use of certain Hazardous Substances (RoHS) and the Waste from Electrical and Electronic Equipment (WEEE) regulations.

RoHS, originally known as directive 2002/96/EC but now more recently known as directive 2002/95/EC RoHS I with revised directives 2011/65/EU RoHS II and 2015/863 RoHS III, originated in the European Union (EU) and restricts the use of ten hazardous materials found in electrical and electronic products.

RoHS specifies maximum levels for the following ten restricted materials:

- Lead (Pb): < 1000 ppm
- Mercury (Hg): < 100 ppm
- Cadmium (Cd): < 100 ppm
- Hexavalent Chromium: (Cr VI) < 1000 ppm
- Polybrominated Biphenyls (PBB): < 1000 ppm
- Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm
- Bis(2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
- Benzyl butyl phthalate (BBP): < 1000 ppm
- Dibutyl phthalate (DBP): < 1000 ppm
- Diisobutyl phthalate (DIBP): < 1000 ppm

WEEE, originally known as directive 2002/96/EC and now more recently known as the revised directive 2012/19/EU, mandates the treatment, recovery and recycling of electric and electronic equipment (90% ends up in landfills). All applicable products in the EU market must pass WEEE compliance and carry the "Wheelie Bin" sticker.

Based on the information available to The Mueller Group from our suppliers, to the best of our knowledge and belief, all of the products that we distribute comply with RoHS and WEEE compliance.

This document is valid without signature and replaces all former statements made by The Mueller Group concerning RoHS and WEEE compliance. Should you require further information, please contact sales@muellergroup.net.
